

HID Mobile Access Guide

HID Mobile Access Guide

Mobile access is the use of a mobile device such as a smartphone, tablet or electronic watch to gain access to secured doors, gates, networks, services and more. Our solutions allow organizations to meet the growing demands of a mobile-first world.

Smartphone's are now everywhere and what could be simpler than having your access card accessible on your device!

Taking that stress out of forgetting your card and having it right in front of you stored safely and secure.

HID Mobile Access Guide

Benefits

Increasing convenience – easily access facilities with a mobile device by simply using “Tap” or “Twist & Go” gestures to activate the access system

Boost Efficiency - Using our online management portal, administrators can create, manage, issue and revoke credentials through the cloud. It really couldn't be any simpler!

Maximise security - Delivered through a highly secure and reliable cloud platform, the solution is powered by Seos credential technology

Contactless - Keep employees and staff safe through over-the-air provisioning and native touchless functionality

HID Mobile Access Guide

HID Mobile Access Requirements

- iCLASS SE and Signo mobile-enabled readers
- HID Origo portal
- Mobile IDs
- HID Mobile Access App
- Optional availability through the Apple® App Store and Google® Play in selected region

HID Mobile Access Guide

Setting up HID Mobile Access on your mobile device in just a few simple steps.

Send – Administrator uploads end-user information singly or in batches and sends an invitation with activation code for each user

Download – The end user receives the invitation and downloads the app onto their device

Enrol – End user opens the app and scans a QR code and their mobile ID is securely provisioned through the portal

GO! – The HID mobile access is secure and ready for use
